CATALOGUE 32

THE FAIRFACTS CO., INC.

VITREOUS CHINA COLORS

A REMARKABLE DEVELOPMENT Fairfacts "Eternité Colors"

Colors fired into genuine vitreous china. Colors shown are available at short notice. Many other shades are made, and also special colors to order from your samples. White, "Mellotone white," and Black are regular glazes. "Mellotone white," is a beautiful, soft light cream; when applied to accessories, goes well with the usual white tile and with colors that harmonize with light cream. Color samples gladly furnished.

These colors we call "ETERNITÉ COLORS," because of their extreme durability.

Satin matt and gloss finishes

"Eternité colors," on vitreous china are a real achievement, the work of several years by our chemists. It was not an easy task.

"ROYAL LINE" DELUXE

R 200

Regular "F LINE" New Design

F 196

The fixtures shown above illustrate our two lines of china accessories.

The "Royal Line," is conservatively modernistic, and is the most elaborate and decorative line of china fixtures made. It harmonizes with the newest and most modern bathroom equipment.

The "F Line," is our regular line, new however, in design and in keeping with the present demand. The former severely plain fixtures served their purpose but are now out of date and old fashioned.

Fairfacts "Eternité Colors" on Fairfacts Vitreous China Bathroom Accessories and on Fairfacts Vitreous China Tile, make a fine combination, either in matched colors or contrasting shades.

VITREOUS CHINA BATHROOM ACCESSORIES

White, Black and Colors

"ROYAL LINE"—DE LUXE

A Conservative Modernistic Design

No finer accessories of the china type ever produced. Recommended for the finest and most modern bathrooms. Royal Line white finish is our "Mellotone," a very light cream satin, a decidedly superior finish that is unusually attractive, a good match for white tile, and a finish that looks well with colors that you would use with a very light cream.

"F.LINE"—THE ORIGINAL LINE

With a New Design with More Attractiveness

The first recessed china accessories made in the world. Patented February 13, August 21, August 28, September 11, October 23, 1917; February 12, May 28, July 16, 1918; April 15, July 29, 1919. See outside back cover for large detail of this new design.

GENERAL

The Double  Triangle, a small one superimposed on a larger one, now appears on the exposed surface of Fairfacts Accessories; an attractive identification of a fine product. This symbol is our "Hall Mark" and your guarantee.

THE FAIRFACTS COMPANY, INC. is the only company, so far as we know, that produces its white, black and colored vitreous china accessories and tile, its entire product, in its own plant.

Fairfacts Accessories and Tile are set by the tile contractor, and for this reason should be included in the tile contract.

Fairfacts Fixtures Should Be Included in the Construction Work and Mentioned in the Tile Specifications

Used with Any Type of Wall Construction or Surface Finish

INTERIOR CONSTRUCTION	BOND	WALL FINISH
Wood stud	Metal lath	Tile
Terra cotta or hollow tile	Wood lath	Plaster
Brick	Plaster board	Keene's cement
Gypsum block	Sheetrock	
Metal stud walls (thin)		

Made in tile sizes—select proper size to fit the tile.

Fairfacts Accessories are made to fit these unit sizes or their multiples, namely, 6x3, 6x6 and $4\frac{1}{4} \times 4\frac{1}{4}$ in.

Types of Fairfacts Fixtures and Methods of Installation

Biltin or Recessed Type—These are recessed almost entirely into the walls, and cemented in place when the tile or other wall finish is put on. Greatest depth required in the wall is $3\frac{3}{4}$ in., except F-180 radiator, which needs 5 in. When used on tiled walls they should be included in the tile contract.

Recessed fixtures that are 6x3, 6x6, 6x9 and 6x12-in. require little cutting of tile when set in $4\frac{1}{4} \times 4\frac{1}{4}$ -in. tile, but require more cutting. All $4\frac{1}{4} \times 4\frac{1}{4}$, 6x4 $\frac{1}{4}$ and $8\frac{1}{2} \times 4\frac{1}{4}$ -in. recessed fixtures are used with $4\frac{1}{4} \times 4\frac{1}{4}$ -in. tile.

Semi-recess Type—Recessed into the wall but 1 in. Are set like recess type and are used in thin partition, or where piping or other obstructions are found in walls. Are cemented in place and have a flange that overlaps the aperture.

Projecting Types—Have special backs or wall attachments cementing to wall.

These backs are of two kinds: "Dowel Back Type" and "Clincher Back Type."

Dowel Back Fixtures—Depth required in wall is 1 in. Dowels are heavy and strong and make a substantial wall attachment.

When Set in Tile Walls—Usually set after the tile is in place. A hole of size and depth of dowel, but slightly larger, is made in wall. Dowel is covered with rich cement or plaster of paris and fixture pushed into place.

Note: Make holes in tile preferably at intersection of tile joints. Be sure hole is not too large to be concealed by fixture.

When Set in Keene's Cement or Plaster Walls—Hole is cut in wall and fixture pushed into place as for tile wall, but it is desirable that pieces of studding with their wide sides towards front be nailed to studs (flush with face of studs) and hole cut in the pieces of studding (see illustration).

Clincher Back Fixtures—Made in tile sizes to avoid cutting the tile. Depth needed in wall is $\frac{3}{4}$ in.

When Set in Tile Walls—Installed when setting tile or opening of right size is left in tile work and fixtures set later. Make openings deep enough for liberal quantity of rich cement or plaster of paris and also cover the back of fixtures and fill the clinchers with the cement. Then tamp fixtures into place until glazed surface is flush with the finished wall.

When Set in Keene's Cement or Plaster Walls—Set fixtures before applying finish coat to wall. Expose the lath where fixtures are to go and set as for tile walls.

Note: For walls with wood stud interior and sheetrock or plaster board bond, see illustration for method of preparing opening. After opening is prepared set fixtures as described for "When set in Tile Walls." See page 10 for more installation data.

FAIRFACTS "F LINE"—REGULAR LINE, NEW DESIGNS

Fairfacts Toilet Paper Holders

F. 1—Has patented rewind roller, see section, keeps paper wound neatly. Is perhaps the best fixture of its type; shown in larger detail because of its unusual merit. Takes rolls of 1000 sheets paste-board cores 1 1/4 in. diameter.

F. 30—Has plain roller.

F. 31—Same as F-30, except with rewind roller.

F. 2—Has plain roller, takes rolls of medium diameter.

F. 03—Takes rolls of large diameter, semi-recess, see page 9.

F. 25, F-26, F-27, F-28, F-025—All take patented folded paper. F-27 also has spring to keep tension on paper.

F. 60—Heavy cast metal, baked finish white, black or colors, takes largest sheet paper. Fixture shown in large detail because of its unusual merit.

F-025—Semi-recess, otherwise like F-25, see page 9.

Look for the

Double Triangle

Fairfacts Towel Bars with China Posts—See Page 9

Bars are of several kinds, i. e.— $\frac{7}{8}$ in. square set edge up, called "non-slip" because towels do not slip off.

Made in pyralin finish, white, black and colors and in glass white, black and crystal.

1-in. round bars are also furnished in pyralin and glass, otherwise as above mentioned.

Regular lengths center to center of posts are: 18, 24, 30, 36, 42 and 48 in., the last two having also a center post. Other lengths to order.

See illustrations page 9, all of substantially same design but with different wall attachments and having designating numbers. Specifications should include quantity, plate number and type, length and color, thus: 24—F-300 non-slip pyralin bars, 18 in. long white, or 12—F-600 round glass bars 30 in. long crystal.

No. F-300—Dowel back type.

No. F-430—Clincher back type, 6x3 back.

No. F-530—Clincher back type, $4\frac{1}{4}$ x $4\frac{1}{4}$ back.

No. F-600—Clincher back type, 3x3 back.

No. F-307—Dowel back type has two $\frac{5}{8}$ -in. square bars, pyralin finish only, and in the same regular lengths up to 36 in.

Fairfacts Glass Shelves with China Brackets—See Page 9

Glass can be furnished in white, black and crystal.

Shelves are 5 in. wide. Those with serial number ending in 0 rest on the brackets. Those with serial number ending in 5 are bolted to brackets.

Length, in.	Dowel back type	Clincher back type
18, 24, 30, 36	F-320	6x3 $4\frac{1}{4}$ x $4\frac{1}{4}$ 3x3
20, 24, 30, 36	F-324	F-460 F-560 F-620
	F-325	F-465 F-565 F-625

Note: F-324 is like F-320, except that shelf is held in place by metal clamps and set screws at back of shelf.

Fairfacts China Kitchen Sink and Shower Stall Trim

Genuine Vitreous China Tile and Trim for Sink and Drainboard and for Surrounding Walls

Wonderfully attractive and serviceable kitchen sink equipment is obtained by using Fairfacts Vitreous China Tile and Trim. The accompanying sketches show the various pieces that may be used in constructing an equipment of this kind, with identifying code numbers. The usual flat rim enameled iron sink of the required size forms the base of this modern idea. Very attractive color schemes may be obtained by referring to the inside front cover of this catalogue.

Fairfacts Vitreous China Shower Stall Trim

Attractive Shower Inclosures and Receptors Made of Fairfacts Genuine Vitreous China Tile and Trim

Sketches show the various pieces that may be used for the walls of the stall and of the receptor, the front sill and entrance; all with identifying code numbers.

Note the unglazed china countersunk waste hole ring for floor of receptor, used around the waste pipe to receive waste fitting. China strainer rests on top of the waste fitting. Waste hole ring makes an ideal contact between floor tile and waste fitting. An all-china shower stall is thus obtained. Attractive color schemes may be obtained by referring to the inside front cover of this catalogue.

Angle designs of mirror and cabinet follow the present-day flair.

The *French Gray Bevel* adds a delicate suggestion of frame to the mirror and eliminates double imaging in the bevel.

Mirror Surface in this new design gives the greatest possible reflecting area in proportion to the cabinet box.

The *Angle Moulding Flange* on the cabinet box adds symmetrical beauty when the door is opened. The *Vertical* surface is ideal to butt the tile against and the *Retreating Angle* surface affords opportunity for a finger hold for opening door. Eliminates knobs. Preserves mirror effect.

The "Arcadian" Cabinet is a harmonious unit in design, construction and ornamentation.

Fairfacts Plate Glass Mirrors shown on this page are waterproofed by the copper process, one of the latest and best methods.

A sheet of insulating material is interposed between the waterproofing and the heavy metal back plate. This plate has the concealed hangers.

Some of the mirrors are mounted like a diamond with no exposed frame.

All these mirrors can be furnished without etching. Where etchings are in black, any color can be matched from your sample, all being applied beneath the glass.

Note: See Page 12 for F-9000 Series Mirror.

"Parisienne" Recess Medicine Cabinets

Frameless Mirror Doors—No Door Knobs—Waterproofed—Metal Backs

Mirror Doors Are Waterproofed by Copper Process

The "Parisienne" is a cabinet with French mirrors of a superlative design exquisitely etched. The mirror is made with an enameled border 1 in. wide in either soft or brilliant color tones or in lustrous black. Black borders only are carried in stock. Colored borders will be made on special orders.

Beautiful results are obtained by putting the black or color on the back of the glass. *A frame effect, 1 in. wide, without a frame.*
